

Front-end web developer

Digital project manager and UX/UI designer passionate about innovation, I have just successfully completed the **Full Stack Web Development** bootcamp at Le Wagon. Today I aspire to become a successful **front-end developer**, combining creativity and technical expertise to design memorable interfaces with **strong user experiences**.

EXPERIENCES

Freelance UX/UI Designer

January – August 2023

Lyon

As a Freelance UX/UI Designer, I have collaborated with various clients from different industries to design intuitive and aesthetically pleasing user interfaces.

- Project framework
- Audit user experience
- Wireframing and Prototyping
- User testing

MyLight Systems Product Designer

September – December 2022

Lyon

In collaboration with the project manager and the lead product designer, my objective was to redesign the B2B portal for the solar photovoltaic installers:

- Project framing: definition of the vision, objectives and metrics to achieved
- User research and benchmarking
- Definition of KPIs, persona and user journey
- Preparation and animation of co-construction and ideation workshops
- Creation of the new user flow and information architecture
- Wireframes and interactive low-fi prototype
- Internal testing of the new prototype

Wright Medical Digital project manager

May 2017 – August 2022

Grenoble

In charge of digital tools for the Wright Medical group in the international area (outside the US):

- Management of Wright's websites, their evolution and content.
- Management of the iOS application for sales representatives and orthopedic surgeons
- Management of the webinar and e-learning platform
- Community management (LinkedIn and Twitter – 60k followers)

For each project: definition of needs, budget management, planning and definition of the roadmap, coordination of teams and service providers, project monitoring, Web analytics and reporting.

Photo and video: responsible for the production and production of videos/photos for internal and external use.
